```javascript
const { Client, GatewayIntentBits } = require('discord.js');
require('dotenv').config();

const client = new Client({ intents: [GatewayIntentBits.Guilds,
GatewayIntentBits.DirectMessages], partials: ['CHANNEL'] });

// Replace this with the Discord user ID of the client you want to DM
const USER_ID = 'DISCORD_USER_ID_HERE';

client.once('ready', () => {
    console.log(`Logged in as ${client.user.tag}!`);

    // Send a test DM to the user
    client.users.fetch(USER_ID)
        .then(user => {
            user.send('Hello! This is MailDMbot. Your messages will appear here.');
        })
        .catch(console.error);
});

client.login(process.env.BOT_TOKEN);
```
